APELDOORN & AMSTERDAM

Currently, we have two locations within our Apeldoorn campus: the Spoorstraat Building and the Brinklaan Building. The Spoorstraat Building, a unique and historic school building, is situated at the centre of the new university square to the north of the railway station. Our head office is in the Brinklaan Building, which is located right next to the city centre and within a 10-minute walking distance from our Spoorstraat Building. Our modern study location in Amsterdam, offers some of our most entrepreneurial, digital and technology focused programmes.

Apeldoorn

Wittenborg's main campus is located in Apeldoorn, in the centre of the Netherlands. Apeldoorn is a pleasantly green, clean and safe city in which to study. Our campuses are situated close to the city centre in two buildings known as the Brinklaan Building and the Spoorstraat Building. Wittenborg students can enjoy 'the gentle lifestyle', while still being only an hour by train or car from the bustling Dutch capital, Amsterdam, or the German border to the east. Schiphol airport is also only an hour away.

Amsterdam

Our Amsterdam study location is situated at the heart of one of Amsterdam's business districts, just 15 minutes away from the capital's tourism and cultural heritage. Amsterdam's international and entrepreneurial character matches perfectly with the needs of modern talents for global orientation, while studying in Amsterdam adds an exciting dimension to the Wittenborg experience. Students following the business and entrepreneurship programmes there often live in the city and combine their studies with business start-ups, which the city is famous for. The campus is within a business complex close to public transport and Schiphol airport.

LOCATIONS

WHY STUDY IN HOLLAND?

With one of the strongest economies in the world, the Netherlands belongs to the top 10 of the most talent-competitive countries, making it one of the most welcoming countries of entrepreneurial talent. The quality of higher education in the Netherlands is highly-recognised. More than 85,000 international students in the Netherlands represent 170 different nationalities.

Although the Netherlands is a small country, it is home to many different nationalities. Compared to other European countries, Dutch people speak good English. Still, it is a good idea to use the opportunity as a student to learn Dutch - at Wittenborg, Dutch classes are offered to all students.

Without doubt, the Netherlands is the bicycle hub of the world. The excellent network of bicycle paths makes cycling a safe, healthy and comfortable way of getting around.

Holland is also perfectly located when it comes to travelling across Europe. Cities such as Berlin, Rome, Paris and Barcelona are all just a couple of hours away by plane from Schiphol airport. The excellent infrastructure as well as low-cost flight, train or bus tickets make travelling easy and accessible. Many international students at Wittenborg organise their studies in such a way as to allow plenty of time for travelling around Europe.

study in NL

Aiming to attract knowledge and retain talent, the Dutch government gives international students the opportunity to find a job within a year or start a business within three years of graduation.

PROGRAMMES

We offer you one of the most flexible entry date systems in the Netherlands, which gives you the possibility to start or graduate 6 times a year.

Since Wittenborg is a University of Applied Sciences, we aim to look at the direct applications our research has in practice and how it can inform decision-making in real-world business settings. This may involve collaborating with industry partners and stakeholders, conducting case studies, or engaging in action research that addresses practical problems faced by businesses and provides actionable insights. By involving all stakeholders and combining different experiences and disciplines, we develop creative and practical solutions for organisations that strengthen the economy and society.

At Wittenborg, we believe in continuous development. Our staff members are encouraged to keep learning & developing, for instance, by pursuing a PhD at one of our partner universities.
